

CLAIMS

- 5 1. A pharmaceutical composition of Glymepirid with Metformin or its salts such as
chlorhydrate, succinate, fumarate, etc., in different excipient formulations, depending
on the proportion used of two active substances.
- 10 2. According to Claim 1, the proportion of the two active substances in the
pharmaceutical compositions may be any of the combinations where Metformin or
its salts are maintained within a range of 100 to 10,000 mg and Glymepirid
between 0.1 and 20 mg.
- 15 3. According to Claims 1 and 2, the proportions of Glymepirid and Metformin or its
salts in the pharmaceutical compositions may be 500 mg of Metformin chlorhydrate
with 1 mg of Glymepirid, 500 mg of Metformin chlorhydrate with 2 mg of
Glymepirid, 1000 mg of Metformin chlorhydrate with 2 mg of Glymepirid, 100 mg
of Metformin chlorhydrate with 4 mg of Glymepirid, or 500 mg of Metformin
chlorhydrate with 4 mg of Glymepirid
- 20 4. According to Claims 1, 2 and 3, the pharmaceutical composition can be used as an
effective therapy to control blood glucose levels in patients with type 2 diabetes.
